

Feature Building

MODEL	QUICKSTRUCTURES ARCH SERIES
SPECS	26' W X 40' L ARCHES AT 4' ON CENTER
USE	VEHICLE STORAGE

Vehicle Storage

This is a 26' x 40' Arch™ building that at first glance looks like the newest addition of Santa's workshop at the North Pole. In reality, this Arch™ building has been built for car storage and is located in Anchorage, Alaska. The customer needed a building that would help to preserve the value of the vehicles by protecting them from harsh weather conditions.

The building features a QuickStructures roll up fabric door as well as a conventional walk-in door (purchased locally). Arch spacing on this building is 4 feet on center.
