

Feature Building

MODEL	QUICKSTRUCTURES ARCH SERIES
SPECS	30' W X 60' L - ARCHES AT 4' ON CENTER
USE	TOPSOIL STORAGE

Topsoil Storage

This 30' x 60' Arch Series building (with arches at 4' on center) is used for topsoil storage. The building is sitting on a 5' 6" Redi-Rock[®] concrete block wall comprised of 128 concrete blocks weighing more than 1500 lbs each. The wall took only 6 hours to construct. The building is sitting on a concrete pad, but this building application can also be erected on compacted gravel foundation to reduce cost.
