

# Feature Building

<b>MODEL</b>	QUICKSTRUCTURES ARCH SERIES
<b>SPECS</b>	30' W X 60' L - ARCHES AT 6' ON CENTER
<b>USE</b>	EVENTS FACILITY

## Outdoors Event Facility

This is a 30' x 60' Arch™ Series Building that is being used as an outdoors events facility. The original building that stood on the site was destroyed during Hurricane Katrina. The organization was looking for a high-quality, cost effective building and chose QuickStructures. The building has been mounted on 6" x 6" diameter posts and arches are spaced at 6' on center.

The Arch™ building is a great choice for an outdoor events facility as it can accommodate a large number of people. The white DuraWeave® fabric provides shade from the sun but still allows natural light to penetrate leaving the space nice and bright. The open walls and the height of the building increase air flow helping to keep the space nice and cool. The building also features a concrete floor which helps to keep guests clean even on those rainy days.
