

Feature Building

Model	Utility Series
Building Use	Golf Cart Storage Facility
Location	Rosthern, SK

26' x 70' Utility Building

Golf Cart Storage Facility

Rosthern Golf Course purchased this QuickStructures Utility building for golf cart and equipment storage. A building this size holds approximately 50 carts and is an excellent way to protect them from sun, wind and weather damage all year long. The building is a ground mount model and was erected on a gravel base. Other features include:

- The Utility building will look good for years to come; the Duraweave fabric won't fade or discolor.
- The bright atmosphere and abundant natural light makes it easy to do routine maintenance tasks on the carts and other course equipment.
- Should unforeseen weather arise, the Utility building's pleasant interior can quickly be converted into a facility for holding a tournament meal inside.
- QuickStructures buildings are quick and easy to install, meaning minimal interruption to the golf season for the golf club.
